

## MILKY WAY

On starless nights, you can admire these stars in your room instead!

### WHAT YOU NEED

- A square of stiff coloured paper
- Pencil
- Scissors
- Cut-outs of stars or other shapes you like
- Needle and thread

### DIRECTIONS

- 1) Draw a spiral with a width of 1cm on the coloured paper. The spiral should make eight circles.
- 2) Cut out the spiral. Ask your parents for help.
- 3) Sew each star (or shape) onto the spiral.
- 4) String a piece of thread through the innermost part of the spiral, then hang it up. Watch how it rotates when the wind blows!
