

SHINING STAR DECORATION

This festive craft is easy and fun to make. Use coloured paper or recycle wrapping paper to decorate your star, or colour your own so that each one is unique. Then hang them on your Christmas tree!

What you need:

- Stiff paper, like coloured construction paper, thin cardboard, a drawing block or paper plates (you can use thinner paper, but it will be more fragile to work with)
- A pair of scissors
- Scotch tape
- Crayons, markers, colour pencils

What to do:

1. Draw out two identical five-point stars on your piece of paper.
2. Decorate each star on both sides in whatever design you like, then cut out each star.
4. On one star, make a cut between two points of the star to the centre of the shape.
5. On the other star, cut from the tip of one point to the centre.
6. Slip the two stars together through the slits. Tape both stars together to secure the shape.
7. Adjust it so that it stands alone, or slip a string through the top so that you can hang it up.
